

# 清华形而上论坛

题目: **Making the right exceptions**

主讲人: **Prof. Frank Veltman**

<http://staff.science.uva.nl/~veltman>

主持人: 王路 教授 (清华大学哲学系)

时间: 5月20日 (周三) 下午 3:00-5:00

地点: 新斋 346 室

**摘要:** Default rules play an important role in our daily lives, as they help us to take decisions in circumstances where the facts of the matter are only partly known. Conflicts among default rules are ubiquitous, and often questions of priority arise. In this talk I will supply a principled account to deal with them. I will do so in two ways: semantically, within a circumscriptive theory, and syntactically by supplying an algorithm for inheritance networks. The latter is sound and complete with respect to the first. I will try my best to underline the philosophical import of the topic.

**介绍:** 弗兰克·威特曼现为荷兰阿姆斯特丹大学逻辑、语言与计算研究所教授, 主要研究领域包括条件句逻辑、语义学和语用学、逻辑与认知、人工智能中的逻辑等等。
